# **International Training Workshop on Focused Ultrasound Therapy (Vietnam)**

## **TIME**

**03 . 28<sup>SAT.</sup> - 03 . 29<sup>SUN.</sup>**

## **VENUE**

**Thien An Obstetrics and Gynecology Hospital**

# **HANOI, VIETNAM**

Organized by

International Society of Minimally Invasive and Virtual Surgery

Vietnam Association of Obstetricians and Gynecologists

Thien An Obstetrics and Gynecology Hospital

# ABOUT THE TRAINING WORKSHOP

International Training Workshop on Focused Ultrasound Therapy provides training courses on Focused Ultrasound therapy for clinicians including obstetricians and gynecologists, oncologists, surgeons, interventional radiologists, etc.

Academic Conference

Case Study & Clinical Practice

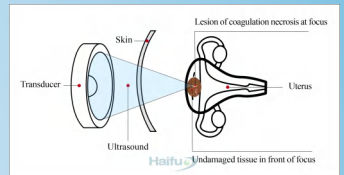

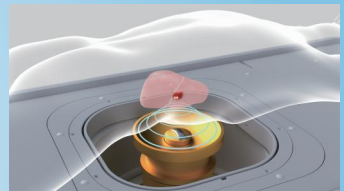

Theoretical Course & Completion Certificate

# WHAT IS FOCUSED ULTRASOUND

Focused ultrasound is a noninvasive therapeutic technology with the potential to transform the treatment of many medical disorders by using ultrasonic energy to target tissue deep in the body without incisions or radiation.

## Indications:

Gynecological disorders such as uterine fibroid, adenomyosis, cervical and vulvar disease, CSP, and AWE; Solid tumors such as liver tumor, pancreatic tumor, kidney tumor, bone tumor, breast fibroadenoma, etc.

## Advantages of Focused Ultrasound:

Non-invasive treatment, anti-tumor immunity activated, minor complications compared to conventional surgeries, no risk of iatrogenic infection, shorter hospital stay, faster recovery after treatment, no blood transfusion required, single-session treatment in most cases.

## HOW TO APPLY

**Register through the link:**

<https://bit.ly/4pm83pm>

**Or scan :**

Application is open from January 8th to February 8th, 2026. Trainees will be admitted for the Training Workshop after screening, and the admission/rejection shall be confirmed by email notification before February 10th.

**Registration fee:**

200 USD (meals and accommodation during the training shall be taken by trainees)

## PAYMENT:

### Wire payment

*Account Name:*

Chongqing Office, International Society of Minimally Invasive and Virtual Surgery (Singapore)

*Bank:*

Bank of China, Chongqing Beibei Sub-branch, Operation Department

*SWIFT Code:*

BKCHCNBJ59A

*Account No.:*

113083500489

*Bank Address.:*

No.1 Shengli Street, Beibei, 400714, Chongqing, China

*Tel:* +86 23 67886799

### On-site payment

Payment could also be made by your arrival at the registration desk

*Enquiry Contact: If you have any questions about registration, please contact Ms. Hannah*

# TRAINING SCHEDULE

(TENTATIVE)

## **March 27 (Friday)**

Arrival and site registration for trainees

## **March 28 (Saturday)**

· AM

Academic Congress

· PM

Theoretical Course & Hands-on Practice

## **March 29 (Sunday)**

· AM

Live treatment & Clinical Protocol

· PM

Theoretical Course & Hands-on Practice

## LECTURER LINE-UP

**Prof. Philippe Descamps**  
Angers University Hospital,  
Angers, France  
(Past FIGO Vice-President)  
(President of ISMIVS)

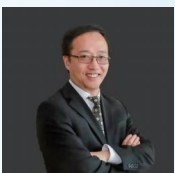

**Prof. Chyi-long Lee**  
Chang Gung Memorial Hospital,  
Taiwan, China  
(Chairman of Board of Trustees of APAGE)

**Prof. Nguyen Viet Tien**  
Thien An Obstetrics and  
Gynecology Hospital, Vietnam  
(President of VAGO)

**Dr. Sevellaraja Supermaniam**  
Mahkota Medical Centre,  
Melaka, Malaysia  
(Vice President of ISMIVS)

**Prof. Lian Zhang**  
Chongqing Haifu Hospital,  
China  
(Secretary General of ISMIVS)

**Prof. Min He**  
National Engineering Center for  
Ultrasound Medicine, China  
(Secretary of ISMIVS)

# CURRICULUM PROVISION

(TENTATIVE)

## **Part I – Theoretical Courses**

1. System introduction;
2. Treatment procedure video study;
3. MRI reading, MRI features of normal uterus and uterine fibroids, and differentiation of benign and malignant tumors;
4. Patient selection;
5. HIFU treatment of uterine fibroids and adenomyosis: Clinical protocol;
6. Clinical application of focused ultrasound therapy in cervical and vulvar diseases;
7. Complications of HIFU treatment and countermeasures.

## **Part II – Hands-on practice on HIFU System**

## **Part III – Case study & clinical application**

# ABOUT THE ORGANIZER

## **International Society of Minimally Invasive and Virtual Surgery (ISMIVS)**

The International Society of Minimally Invasive and Virtual Surgery (ISMIVS), previously known as International Society of Minimally Invasive and Noninvasive Medicine, was founded in July 2013 in Chongqing, China. ISMIVS' vision is to accelerate the development of minimally invasive and noninvasive medicine through the clinical research, training, academic communications, and international collaborations. ISMIVS has convened 5 sessions of Yangtze International Summit on Minimally Invasive and Noninvasive Medicine. The current president is Prof. Philippe Descamps from Angers University Hospital, France. Visit us on [www.isminim.org](http://www.isminim.org)

## **Vietnam Association of Obstetricians and Gynecologists (VAGO)**

VAGO is a professional medical organization in the field of obstetrics and gynecology in Vietnam. The Association brings together obstetricians, gynecologists, medical specialists, researchers, and healthcare professionals working in the specialty, with the aim of improving the quality of women's healthcare, particularly maternal and neonatal health.

VAGO plays a central role as the leading professional organization in obstetrics and gynecology in Vietnam, contributing significantly to the development of the specialty. Its activities help improve the quality of clinical care, promote medical research, strengthen specialized training for healthcare professionals, and support the establishment of modern, evidence-based treatment standards in alignment with international integration.

## Thien An Maternity Hospital

Thien An Maternity Hospital is a private specialized hospital in obstetrics and gynecology, established in January 2020, operating under Thien An Tay Ho Joint Stock Company. The hospital's guiding philosophy is “Building trust, nurturing life.”

The hospital is located at No. 27, Alley 603, Lac Long Quan Street, Xuan La Ward, Tay Ho District, Hanoi, with a total construction area of nearly 5,000 square meters. It has been systematically invested with high-standard infrastructure and modern medical equipment, much of which is imported from internationally renowned manufacturers, to ensure high-quality services in examination, diagnosis, and treatment in obstetrics and gynecology.
